

Recent results of measurement of CKM angle γ and CPV in the beauty sector at LHCb.

Monday, 6 June 2022 11:45 (25 minutes)

The latest studies of beauty-meson decay to open-charm final states from LHCb. It includes recent studies of CKM angle γ and CPV parameters in the beauty sector, especially the recent measurement of direct CPV in B^+ decays. Measurements from several decay modes are presented.
