

Mixing and indirect CP violation in charm mesons at LHCb:

Monday, 6 June 2022 10:55 (25 minutes)

LHCb has collected the world's largest sample of charmed hadrons. This sample is used to measure $D^0 - \bar{D}^0$ mixing and to search for CP violation in mixing and interference. New measurements from several decay modes are presented, as well as prospects for future sensitivities.
